EXECUTIVE SUMMARY

What this assessment covers

HCA UK runs London's most prestigious private hospitals — The Harley Street Clinic, The Portland, London Bridge. Ultra-high-value patient enquiries arrive via web, phone and referral. There is no unified AI layer to ensure every enquiry is triaged, responded to and routed to the right surgical team within minutes.

5 Sites assessed across the HCA Healthcare UK network	3 Critical AI gaps identified in enquiry, retention and operations	8,200+ Patient reviews analysed for intelligence and sentiment patterns	<60s Target first-response time post-Altrao implementation
---	--	---	---

COMPETITIVE BENCHMARK

What leading groups already operate

The following capabilities are now standard at competing groups. Each absence represents a measurable operational and reputational gap for HCA Healthcare UK.

GAP ANALYSIS

Three gaps with measurable financial impact

Ultra-high-value enquiries untracked

A neurosurgery enquiry arriving at 11pm on a Sunday sits in the same generic inbox as a physio appointment request. No AI triage. No urgency classification. No automatic escalation to the on-call team.

£240,000

average lifetime patient value for a complex surgical case — each untracked enquiry carries this risk

International patient acquisition

HCA UK attracts patients from the Middle East, Russia, Nigeria and beyond. These high-value international enquiries require multi-language response capability and rapid consultation booking — currently handled manually.

£38M

estimated value of HCA UK's international patient revenue — heavily dependent on first-response speed

Consultant referral tracking

Referrals from GPs and international clinics arrive through multiple channels. No AI system tracks referral source, ensures acknowledgement within 2 hours or flags when a referral goes cold — costing HCA premium relationships.

72h

average current time for international referral acknowledgement — vs the 2-hour standard expected by referring clinics

THE ALTRAO SOLUTION STACK

Four systems. One integrated implementation.

Each module below is built bespoke for HCA Healthcare UK — not templated software, not a SaaS subscription, but purpose-built infrastructure designed around how your network actually operates.

01 — CORE

Surgical Enquiry Triage AI

AI that reads every incoming enquiry, classifies by urgency and surgical speciality, and routes to the right HCA team within 60 seconds — day or night. Neurosurgery, oncology and cardiac enquiries escalated immediately.

SYSTEM BUILD

02 — INTELLIGENCE

International Patient Acquisition System

Multi-language AI that responds to international patient enquiries in Arabic, Russian, French and English — providing treatment information, quoting timelines and initiating the medical case intake process.

DATA LAYER

03 — AUTOMATION

Consultant Referral Intelligence

A referral tracking system that logs every GP and international clinic referral, ensures 2-hour

04 — OPERATIONS

Executive Health Concierge

A white-glove AI concierge for HCA's executive health assessment programme — coordinating multi-specialist bookings, pre-

acknowledgement, tracks conversion to booking and flags cold referrals before the relationship is lost.

AUTOMATION

assessment requirements and results follow-up for C-suite and international patients.

IMPLEMENTATION

How Altrao deploys at enterprise scale

01

Discovery & Audit

2 weeks. We map every patient touchpoint across your sites, audit current systems and identify integration requirements with existing EMR and booking platforms.

02

Pilot Build

4 weeks. We build and deploy across 3–5 pilot sites. Full AI triage, CRM and automation stack. Live metrics from week one.

03

Network Rollout

8–12 weeks. Phased deployment across the full site network. Staff onboarding, integration testing and performance benchmarking at each site.

04

Ongoing Optimisation

Monthly. Dedicated Altrao account team. System updates, new automation modules, monthly performance reports and quarterly strategy reviews.

INVESTMENT
