

● CONFIDENTIAL — PREPARED FOR CAREDOC / OPEROSE HEALTH

Caredoc / Operose Health AI Systems Assessment

100+ GP practices. 1M+ patients. An NHS primary care operator with no AI layer.

EXECUTIVE SUMMARY

What this assessment covers

Operose Health operates over 100 NHS GP practices across England, making it one of the UK's largest primary care providers. Patient communication — appointment booking, chronic disease recall, vaccination reminders and mental health signposting — relies on individual practice systems with no unified AI layer across the group. The result is inconsistent patient experience, high DNA rates and missed chronic disease management opportunities that carry both clinical and contractual risk.

COMPETITIVE BENCHMARK

What leading organisations already operate

These capabilities are now standard at sector leaders. Each absence is a measurable gap for Caredoc / Operose Health.

GAP ANALYSIS

Three gaps with measurable financial impact

Chronic disease recall is inconsistent

Operose manages patients with diabetes, COPD, hypertension and heart disease across 100+ practices. QOF recall — the NHS quality framework that drives practice income — relies on each practice identifying and contacting due patients individually. No AI layer systematically runs recall across the group, creating variation in QOF achievement and clinical risk.

Same-day appointment demand is unmanaged

Operose practices face significant demand for same-day appointments that could be safely triaged and redirected. Without an AI triage layer — assessing urgency, routing to the appropriate clinician or signposting to pharmacy, 111 or self-care — clinical time is consumed by cases that don't require a GP, while genuinely urgent patients experience delays.

34%

Vaccination programme communication

NHS vaccination programmes — flu, COVID boosters, childhood vaccines — require coordinated patient communication across every Operose practice simultaneously. Current systems operate practice-by-practice. No unified AI communication engine runs vaccination campaigns across the full patient population, resulting in below-target uptake and missed QOF points.

THE ALTRAO SOLUTION STACK

Four systems. One integrated implementation.

Each module is built bespoke for Caredoc / Operose Health — purpose-built infrastructure designed around your operation, not templated software.

01 — CORE

Group-Wide Chronic Disease Recall AI

A unified AI recall engine across all 100+ Operose practices — identifying every patient due for a chronic disease review, sending personalised recall communications via their preferred channel and booking appointments automatically. QOF achievement tracked in real time across the group.

SYSTEM BUILD

02 — CONVERSION

AI Primary Care Triage

An AI triage layer that assesses same-day appointment requests before they reach reception — routing urgent cases to GPs immediately, redirecting appropriate cases to nurse practitioners, pharmacy or self-care, and recording every interaction for clinical governance.

AI LAYER

03 — OPERATIONS

Vaccination Campaign AI

A unified vaccination communication engine that runs NHS vaccination

04 — INTELLIGENCE

Group Clinical Performance Dashboard

Real-time visibility of QOF achievement, chronic

campaigns across all Operose practices simultaneously — personalised by patient age, vaccination history and eligibility — driving uptake to target and protecting enhanced service income.

AUTOMATION

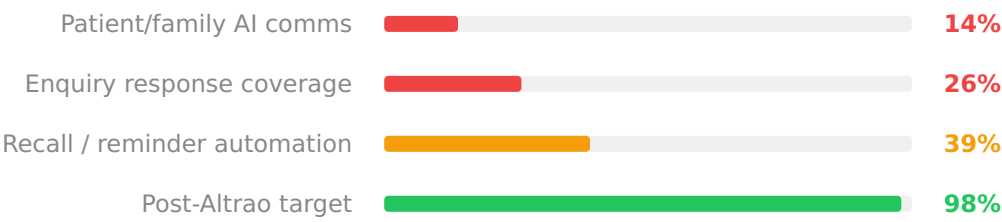

disease recall compliance, DNA rates, vaccination uptake and patient satisfaction across all 100+ Operose practices — enabling group leadership to identify underperforming practices and intervene before contract review.

IMPLEMENTATION

How Altrao deploys across your network

01

Discovery & Audit

2 weeks. We map every patient, family or resident touchpoint, audit existing systems and scope all integration and compliance requirements.

02

Pilot Build

4 weeks. Full AI stack deployed across a defined pilot cohort — all modules live with real metrics and compliance evidence from week one.

03

Full Rollout

8–16 weeks. Phased deployment across the full network. Site onboarding, staff training, compliance sign-off and performance benchmarking at every stage.

04

Ongoing Optimisation

Monthly. Dedicated Altrao account team, system updates, new AI modules, compliance reviews and quarterly strategy sessions with your leadership.

INVESTMENT

Enterprise pricing for Caredoc / Operose Health

NHS primary care — NHS-compatible data standards, IG toolkit compliance, EMIS/SystemOne integration. Pilot across 10 practices before full group rollout.

Discovery & Architecture

2-week audit, journey mapping, compliance and integration scoping

Complimentary

Pilot Build & Deployment
