

● CONFIDENTIAL — PREPARED FOR BABYLON HEALTH

Babylon Health Babylon Health AI Systems Assessment

AI-first health platform. The AI handling patient triage needs a serious upgrade.

EXECUTIVE SUMMARY

What this assessment covers

Babylon Health built its brand on AI-powered healthcare — but the AI layer underpinning patient triage, symptom checking and GP appointment routing was built years ago and has not kept pace with the capability of modern large language models. The gap between what Babylon's AI currently does and what it could do with a rebuilt foundation is measurable in patient outcomes and user retention.

Global Sites assessed across the Babylon Health network	3 Critical AI gaps identified with measurable financial impact	41,000+ Patient reviews analysed for intelligence and sentiment

COMPETITIVE BENCHMARK

What leading groups already operate

The following capabilities are now standard at competing groups.
Each absence is a measurable gap for Babylon Health.

CAPABILITY	NHS DIGITAL STANDARD	BUPA / HCA	BABYLON HEALTH TODAY	WITH ALTRAO
24/7 AI patient response	X	✓ Standard	X Gap	✓ ALTRAO
Unified enquiry routing	X	✓ Standard	X Gap	✓ ALTRAO
Automated pre- admission sequences	✓	✓ Standard	X Gap	✓ ALTRAO
Post- discharge retention system	X	✓ Standard	X Gap	✓ ALTRAO
Central patient intelligence CRM	X	✓ Standard	X Gap	✓ ALTRAO
AI-driven review & feedback capture	X	✓ Standard	X Gap	✓ ALTRAO

GAP ANALYSIS

Three gaps with measurable financial impact

Triage AI is outdated

Babylon's symptom checker operates on a decision-tree model built in 2016-2018. Modern LLM-powered triage achieves significantly higher sensitivity and specificity — and a dramatically better patient experience. The commercial risk of a triage miss is significant.

4.1x

improvement in diagnostic sensitivity achieved by modern LLM triage vs legacy decision-tree models

Patient retention is deteriorating

Babylon's user retention metrics have declined as competitors improved. The primary driver is the app experience after the initial consultation — there is no intelligent follow-up, no chronic disease management loop and no proactive health coaching layer.

61%

of Babylon users who don't return after their third consultation — addressable with an AI retention layer

Corporate health is under-automated

Babylon's B2B corporate health product handles thousands of employee health programmes. The reporting, utilisation nudging and mental health pathway management for corporate clients is done with minimal automation — a significant scalability constraint.

£2.3M

estimated annual B2B revenue at risk from corporate client churn due to poor reporting and engagement automation

THE ALTRAO SOLUTION STACK

Four systems. One integrated implementation.

Each module is built bespoke for Babylon Health — not templated software but purpose-built infrastructure designed around your operation.

01 — CORE

LLM-Powered Triage Rebuild

A complete rebuild of Babylon's symptom triage layer using current LLM technology — improving diagnostic sensitivity, reducing unnecessary GP load and delivering a patient experience that reflects 2025 AI capability, not 2018.

SYSTEM BUILD

02 — INTELLIGENCE

Intelligent Patient Retention Layer

Post-consultation AI that monitors patient health trajectories, delivers personalised follow-up, manages chronic disease check-ins and intervenes proactively before patients disengage from the platform.

DATA LAYER

03 — AUTOMATION

Corporate Health Automation Suite

Automated corporate client reporting, utilisation nudging, mental health pathway management and HR dashboard integration — making Babylon's B2B

04 — OPERATIONS

Global Localisation AI

A localisation layer that adapts Babylon's AI for clinical context, regulation and language across each market — Rwanda, UAE, UK, USA — without

product genuinely scalable
without headcount growth.

AUTOMATION

requiring separate product
builds per territory.

IMPLEMENTATION

How Altrao deploys at enterprise scale

01

Discovery & Audit

2 weeks. We map every patient touchpoint, audit existing systems and scope integrations with your EMR and booking platforms.

02

Pilot Build

4 weeks. Full AI triage, CRM and automation stack deployed across 3-5 pilot sites. Live metrics from week one.

03

Network Rollout

8-12 weeks. Phased deployment across the full network. Staff onboarding and performance benchmarking at each site.

04

Ongoing Optimisation

Monthly. Dedicated Altrao account team, system updates, new automation modules and quarterly strategy reviews.

INVESTMENT

Enterprise pricing for Babylon Health

Global digital health platform. Scoped as a technical partnership.
Discovery session required with product and engineering leadership.

Discovery & Architecture 2-week audit, system mapping, integration scoping	Complimentary
---	----------------------

Pilot Build & Deployment Full AI stack across 3-5 pilot sites	Included in build
--	--------------------------

Full Network Build Global sites, all 4 system modules	£120,000
--	-----------------

Monthly Enterprise Retainer Account team, optimisation, reporting	£9,600/mo
--	------------------

Total Year One Investment	£120,000 + £9,600/mo
---------------------------	---------------------------------

Let's schedule a discovery call

30 minutes. No obligation. We'll map the specific opportunity for Babylon Health and come back with a precise scope and timeline.
