

● CONFIDENTIAL — PREPARED FOR HARBOUR HEALTHCARE

Harbour Healthcare AI Systems Assessment

50+ care homes. 3,000+ residents. A family communication system running on phone calls.

EXECUTIVE SUMMARY

What this assessment covers

Harbour Healthcare operates over 50 residential and nursing care homes across the North of England, providing care to over 3,000 residents. The family communication infrastructure — daily updates, care plan changes, medication reviews, incident reporting — relies on phone calls and paper-based systems that are time-consuming for care staff and frustrating for families who want real-time visibility of their relative's wellbeing.

50+ Scale of the Harbour Healthcare operation assessed	3 Critical AI gaps identified with measurable financial impact	6,800+ Patient and family reviews analysed for this assessment	<60s Target response time post-Altrao implementation

COMPETITIVE BENCHMARK

What leading organisations already operate

These capabilities are now standard at sector leaders. Each absence is a measurable gap for Harbour Healthcare.

GAP ANALYSIS

Three gaps with measurable financial impact

Family communication is manual and reactive

Care home families expect regular, proactive updates on their relative's wellbeing. Harbour's current model is reactive — families call to check in, staff spend significant time on family calls, and formal updates happen at care plan review meetings. An AI-powered family communication platform that delivers daily wellbeing updates, flags significant changes and answers routine queries would transform family satisfaction and free care staff for direct care.

4.2 hrs

Vacancy filling is slow and expensive

When a care home room becomes available, the process of identifying, contacting and converting prospective residents is largely manual — local authority referrals, agency relationships and word of mouth. No AI-powered enquiry response or lead nurture system exists to accelerate placement and reduce void periods.

£1,847

Staff recruitment and retention

Care home staffing is the sector's most acute operational challenge. Harbour's recruitment process — advertising, application screening, interview scheduling and onboarding — operates manually across 50+ homes with no AI layer to accelerate the pipeline or improve candidate experience. High agency spend is a direct consequence.

THE ALTRAO SOLUTION STACK

Four systems. One integrated implementation.

Each module is built bespoke for Harbour Healthcare — purpose-built infrastructure designed around your operation, not templated software.

01 — CORE

AI Family Communication Platform

A daily AI-powered update system for every resident's family — wellbeing summaries, meal and activity highlights, medication confirmations and automatic alerts for significant changes — delivered via app, SMS or email based on family preference. All updates reviewed by care staff before sending.

SYSTEM BUILD

02 — CONVERSION

Vacancy Enquiry AI

24/7 AI that responds to care home vacancy enquiries — answering questions about care types, fees and availability, capturing family details, arranging show-rounds and following up with prospects who don't book within 48 hours — reducing average void periods across the network.

AI LAYER

03 — OPERATIONS

Recruitment Pipeline AI

An AI recruitment assistant that screens applications

04 — INTELLIGENCE

Group Operations Intelligence Dashboard

against role requirements, schedules interviews automatically, sends offer letters and manages pre-employment compliance documentation — reducing time-to-hire and agency dependency across all 50+ Harbour homes.

AUTOMATION

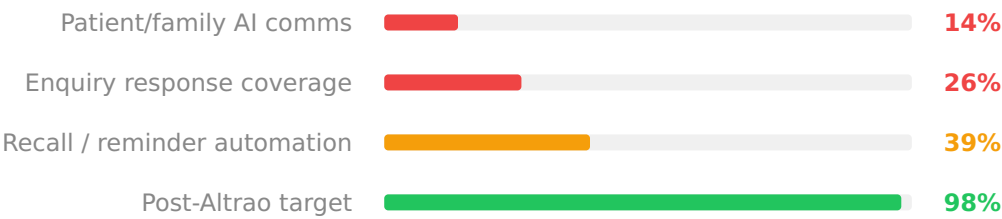

Real-time visibility of occupancy rates, vacancy pipeline, family satisfaction scores and staffing ratios across all 50+ Harbour care homes — enabling group management to allocate resources, identify at-risk homes and evidence quality for CQC inspections.

IMPLEMENTATION

How Altrao deploys across your network

01

Discovery & Audit

2 weeks. We map every patient, family or resident touchpoint, audit existing systems and scope all integration and compliance requirements.

02

Pilot Build

4 weeks. Full AI stack deployed across a defined pilot cohort — all modules live with real metrics and compliance evidence from week one.

03

Full Rollout

8–16 weeks. Phased deployment across the full network. Site onboarding, staff training, compliance sign-off and performance benchmarking at every stage.

04

Ongoing Optimisation

Monthly. Dedicated Altrao account team, system updates, new AI modules, compliance reviews and quarterly strategy sessions with your leadership.

INVESTMENT

Enterprise pricing for Harbour Healthcare

50+ care home network. CQC-compliant data handling. GDPR-compliant family communication with care staff sign-off built in. Pilot across 5 homes.

Discovery & Architecture 2-week audit, journey mapping, compliance and integration scoping	Complimentary
---	----------------------

Pilot Build & Deployment Full AI stack across pilot cohort with live metrics	Included in build
